NEVER dilute or water down formula. Follow all label instructions. Diluting infant formula can be dangerous and even life-threatening for babies.

Homemade formula is not safe and does not meet your baby’s nutritional needs.

Babies under the age of 1 should not drink cow’s milk, soy milk or any other plant-based milk.

Louisiana WIC participants may replace recalled Similac, Alimentum or EleCare powdered infant formulas by:

- Returning the formula to the store where it was purchased
- Returning the formula to Abbott by calling 1-800-956-8540 or visiting similacrecall.com
- Returning the product to a local WIC clinic
