

Exhibit A: Louisiana WIC Approved Formula List
May 2025
For Medical Providers Only

Standard Infant Formulas

WIC provides contracted formulas as part of a federally mandated cost containment system. In accordance with federal regulations, all WIC formula fed infants may receive any of the standard contract formulas listed below.

Formula name	PWD, CONC, RTF /size	Intended Use
Similac Advance w/ Iron <i>Abbott</i>	PWD - 12.4 oz. CONC - 13 oz. RTF - 32 oz. *	Milk based infants formula, includes DHA, ARA and prebiotics.
Similar Soy Isomil w/Iron <i>Abbott</i>	PWD - 12.4 oz. CONC - 13 oz. RTF - 32 oz. *	Soy based formula, includes DHA and ARA
Similac Sensitive w/ Iron <i>Abbott</i>	PWD - 12.5 oz. RTF - 32 oz.*	Milk-based infant formula with reduced lactose for infants with lactose sensitivity or intolerance.
Similac Total Comfort w/ Iron <i>Abbott</i>	PWD - 12.6 oz.	Partially hydrolyzed whey protein, an alternative to standard intact-protein, milk-based formulas. Suitable for lactose sensitivity; for infants who may have difficulty tolerating other milk-based formulas.
Similac Total Care 360 <i>Abbott</i>	RTF 32 oz. * RTF 8 oz. *	Milk-based non-GMO infant formula, containing 5 HMO prebiotics.
Similac Total Care 360 Sensitive <i>Abbott</i>	RTF 32 oz. * RTF 8 oz. *	Milk-based non-GMO infant formula, containing 5 HMO prebiotics. Suitable for infants with lactose sensitivity

* The CPA may approve and issue a RTF **standard contract formula** when one or more of the following conditions are met:

1. Unsanitary/restricted water supply,
2. Poor refrigeration
3. The participant's caregiver is cognitively/physically unable to correctly dilute concentrated liquid or powdered formula.

This list is subject to change. Please review the Louisiana WIC website: louisianawic.org for updated information

PWD - Powder, RTF - Ready to Feed, CONC - Concentrate

CPA - Certified Professional Authority (Nutritionist, Registered or Licensed Nurse, or Health Educator)

Exempt Formulas

A WIC participant may have a medical condition and need medical formulas that are not part of a WIC formula contract. Health Care Providers must provide a WIC 48 or a medical prescription when requesting WIC-eligible formulas for their patients that have a qualifying medical condition.

Premature		
Formula name	PWD, CONC, RTF /size	Intended Use
Similac Special Care 24 cal. <i>Abbott</i>	RTF - 2 oz.	A 24 Cal/fl oz. iron-fortified formula for growing, low-birth-weight and premature infants. Not intended for feeding low-birth-weight infants after they reach a weight of 3600 g (approximately 8 lb.) or as directed by a physician
Similac Special Care 24 cal. High Protein <i>Abbott</i>	RTF - 2 oz.	A 24 Cal/fl oz. iron-fortified premature infant formula for low-birth-weight infants who may need extra protein to help support growth. Not intended for feeding low-birth-weight infants after they reach a weight of 3600 g (approximately 8 lb.) or as directed by a physician
Similac Special Care 30 <i>Abbott</i>	RTF - 2 oz.	A 30cal/oz. infant formula for premature or low-birth weight infants. Not intended for feeding low-birth-weight infants after they reach a weight of 3600 g (approximately 8 lb.) or as directed by a physician
Enfamil Premature 20 cal. <i>Mead Johnson</i>	RTF - 2 oz.	Milk-based infant formula with 20 Calories/fl oz. for premature or low birth weight infants who are not being breastfed. When more than 14 fl oz. is used per day, some nutrients may be excessive. In such circumstances, it should be used only at the direction and under the supervision of a doctor.
Enfamil Premature 24 cal. <i>Mead Johnson</i>	RTF - 2 oz.	For the management of premature and low birth weight infants. When more than 12 fl oz. is used per day, some nutrients may be excessive. In such circumstances, it should be used only at the direction and under the supervision of a doctor.
Premature - post discharge		
Similac Neosure <i>Abbott</i>	RTF - 2 oz. PWD - 13.1 oz.	A 22-calorie formula designed for babies who were born prematurely to be used as a preterm post-discharge formula.
Enfamil Neuropro Enficare <i>Mead Johnson</i>	RTF - 2 oz. PWD - 13.6 oz.	A 22 calorie/ounce formula post discharge formula for infants who were born prematurely or with low birth weights.

Exempt Formulas

A WIC participant may have a medical condition and need medical formulas that are not part of a WIC formula contract. Health Care Providers must provide a WIC 48 or a medical prescription when requesting WIC-eligible formulas for their patients that have a qualifying medical condition.

Allergy Formulas		
Formula name	PWD, CONC, RTF /size	Intended Use
Enfamil Nutramigen with Enflora LGG <i>Mead Johnson</i>	PWD - 12.6 oz.	20 Cal/fl oz., lactose-free, hypoallergenic infant formula designed for infants who have food allergies including cow's milk allergy. Contains has extensively hydrolyzed casein protein to help avoid an immune system response by reducing the allergen exposure, and the probiotic branded LGG to help support the strength of the intestinal barrier and support digestive health.
Enfamil Nutramigen (liquids) <i>Mead Johnson</i>	CONC - 13 oz. RTF - 32 oz. RTF - 2 oz.	20 Cal/fl oz., hypoallergenic infant formula designed for infants who are allergic to the intact proteins in cow's milk and soy formulas. Contains extensively hydrolyzed casein protein to help avoid an immune response by reducing the allergen exposure and is proven effective for managing colic due to cow's milk allergy.
Similac Alimentum <i>Abbott</i>	RTF - 2 oz. RTF -32 oz. PWD - 12.1 oz.	A 20 Cal/fl oz., hypoallergenic formula for infants, including those with colic symptoms due to cow's milk protein sensitivity, food allergies, or sensitivity to intact protein. RTF formula is corn free.
Extensive HA <i>Nestle</i>	PWD - 14.1 oz.	Hypoallergenic, whey protein extensively hydrolyzed formula for infants who are sensitive to intact protein in milk based formulas contains probiotics; B. lactis. Indicated for cow's milk protein allergy, and intolerance, (FPIES), soy protein sensitivity, and fat malabsorption.
Pepticate Infant <i>Nutricia</i>	PWD 13.2 oz.	A 20 Cal/fl oz., whey-based hypoallergenic, extensively hydrolyzed formula for infants, contains DHA, ARA, nucleotides, lactose and a clinically tested blend of prebiotic fibers.
Amino Acid Based Formulas		
PurAmino DHA/ARA <i>Mead Johnson</i>	PWD - 14.1 oz.	Hypoallergenic, amino acid-based infant formula for the dietary management of infants with severe cow's milk protein allergy, not effectively managed by an extensively hydrolyzed formula. Also for infants with multiple food protein allergies. It may also be suitable for conditions requiring an elemental diet such as protein maldigestion, malabsorption, short bowel syndrome and eosinophilic esophagitis.
Elecare Infant DHA/ARA <i>Abbott</i>	PWD - 14.1 oz.	Hypoallergenic, amino acid-based formula for infants who cannot tolerate intact or hydrolyzed protein, protein maldigestion, malabsorption, severe food allergies, short-bowel syndrome, eosinophilic GI disorders, GI-tract impairment, or other conditions in which an amino acid based diet is required.
Neocate Infant DHA/ARA <i>Nutricia</i>	PWD - 14.1 oz.	Hypoallergenic, amino acid-based infant formula with DHA and ARA, for the management of cow milk allergy, multiple food allergies and related GI conditions.
Neocate Syneo Infant <i>Nutricia</i>	PWD - 14.1 oz.	Hypoallergenic, amino acid-based formula with prebiotics and probiotics for infants with food allergies. This product is appropriate for food allergies, including cow's milk, and related GI issues such as GERD, FPIES and EoE.
Alfamino Infant <i>Nestle</i>	PWD - 14.1 oz.	Hypoallergenic amino acid based infant formula. Indicated for: Cow's milk protein allergy, multiple food allergies, Eosinophilic GI disorders, Malabsorptive condition and short bowel syndrome

Exempt Formulas

A WIC participant may have a medical condition and need medical formulas that are not part of a WIC formula contract. Health Care Providers must provide a WIC 48 or a medical prescription when requesting WIC-eligible formulas for their patients that have a qualifying medical condition.

Special Formulas		
Formula name	PWD, CONC, RTF /size	Intended Use
Enfamil AR <i>Mead Johnson</i>	RTF – 2 oz. PWD – 12.9 oz.	A thickened, milk-based infant formula with added rice starch to help reduce frequent spit-up.
Similac PM 60/40 <i>Abbott</i>	PWD - 14.1 oz.	For infants who would benefit from lowered mineral intake, including those with impaired renal function. Low-iron infant formula.
Enfaport <i>Mead Johnson</i>	RTF 6 oz.	A 30 calorie/fl oz., milk-based formula for infants with chylothorax or LCHAD. Product has a 60:40 whey: casein protein blend.
Pregestimil 20 cal. <i>Mead Johnson</i>	RTF - 2 oz. PWD - 16 oz.	A 20 calorie/fl oz. hypoallergenic formula with MCT, for infants who experience fat malabsorption and who may also be sensitive to intact proteins.
Pregestimil 24 cal. <i>Mead Johnson</i>	RTF - 2 oz.	A 24 calorie/fl oz. hypoallergenic formula with MCT, for infants who experience fat malabsorption and who may also be sensitive to intact proteins.
Enfamil 24 <i>Mead Johnson</i>	RTF -2 oz.	24 Cal/fl oz. milk based formula for full term infants that require increased caloric density.

WIC-Eligible Nutritionals

A WIC participant may have a medical condition and need medical nutritionals that are not part of a WIC formula contract.

Health Care Providers must provide a WIC -48 or a medical prescription when requesting WIC-eligible nutritionals for their patients that have a qualifying medical condition.

Nutritional name	PWD, CONC, RTF /size/flavor	Intended Use
Pediasure Enteral 1.0 cal <i>Abbott</i>	RTF - 8 oz. Vanilla	Formulated for tube feeding children 1 to 13 years of age. Milk-based, suitable for lactose intolerance, gluten free.
Pediasure Enteral 1.0 cal with Fiber <i>Abbott</i>	RTF - 7.4 oz. RTF - 8 oz. Vanilla.	Formulated for tube feeding children 1 to 13 years of age who need extra fiber. Milk-based, suitable for lactose intolerance, gluten free
Pediasure Peptide 1.0 cal <i>Abbott</i>	RTF - 8 oz. Unflavored Vanilla, Chocolate Strawberry	Peptide-based formula for the nutritional needs of children ages 1-13 years with malabsorption, maldigestion, and other GI conditions where hydrolyzed protein is indicated. For oral or tube feeding. 237 cal/8 oz
Pediasure Peptide 1.5 cal <i>Abbott</i>	RTF - 8 oz. Vanilla	Peptide-based formula for the nutritional needs of children ages 1-13 years with malabsorption, maldigestion, and other GI conditions where hydrolyzed protein is indicated. For oral or tube feeding. 356 cal/8 oz.
Puramino Junior <i>Mead Johnson</i>	PWD - 14.1 oz. Unflavored Vanilla	30 Cal/fl oz., hypoallergenic, amino acid based medical food for the dietary management of children with severe cow's milk protein allergy, not effectively managed by an extensively hydrolyzed formula.
Alfamino Junior <i>Nestle</i>	PWD - 14.1 oz. Unflavored Vanilla	Hypoallergenic amino-acid formula for children ages 1-13.
Neocate Junior unflavored (without Prebiotics) <i>Nutricia</i>	PWD -14.1 oz. Unflavored	Amino acid-based medical food for individuals over the age of one. Indications: cow milk allergy, multiple food allergies, related GI and allergic conditions: EoE, FPIES, GER, SBS, malabsorption.
Neocate Syneo Junior <i>Nutricia</i>	PWD - 14.1 oz	Amino acid based formula with pre and probiotics, for children 1-10 years old with food related allergies and related GI and allergic conditions, EGIDs, FPIES and GERD related to food allergies
Neocate Junior (with prebiotic fiber) <i>Nutricia</i>	PWD - 14.1 oz. Vanilla Chocolate Strawberry	Amino acid-based medical food with prebiotics for individuals over the age of one. Indications: cow milk allergy, multiple food allergies, related GI and allergic conditions: EoE, FPIES, GER, SBS, malabsorption.
Elecare Junior <i>Abbott</i>	PWD - 14.1 oz. Unflavored Vanilla Chocolate Banana	30 Cal/fl oz., amino acid-based formula for children age 1 and older who cannot tolerate intact or hydrolyzed protein. Indicated for dietary management of protein maldigestion, malabsorption, food allergies, SBS, EoE, GI disorders, GI tract impairment, or other conditions in which an amino acid-based diet is required.

WIC-Eligible Nutritionals

A WIC participant may have a medical condition and need medical nutritionals that are not part of a WIC formula contract.

Health Care Providers must provide a WIC -48 or a medical prescription when requesting WIC-eligible nutritionals for their patients that have a qualifying medical condition.

Nutritional name	PWD, CONC, RTF /size/flavor	Intended Use
Peptamen Junior 1.0 <i>Nestle</i>	RTF 8.45 oz. Unflavored Vanilla Strawberry	1.0 cal/mL peptide based nutritionally complete formula for oral supplementation (vanilla, strawberry) or tube feeding (unflavored) for the nutritional need of children with impaired GI function, malabsorption, growth failure, chronic diarrhea. For ages 1-13 years 250 cal/8.45 oz.
Peptamen Junior 1.5 <i>Nestle</i>	RTF 8.45 oz. Unflavored Vanilla ☐	1.5 cal/mL peptide based, calorically dense, nutritionally complete formula for oral supplementation or tube feeding, for the nutritional needs of children with impaired GI function, malabsorption, growth failure, chronic diarrhea. For ages 1-13 years, 375 cal/8.45 oz.
Pediasure Grow & Gain <i>Abbott</i>	RTF - 8 oz. Vanilla, Chocolate Straw, Banana S'more	A source of complete, balanced nutrition especially designed for children 2-13 years of age. 240 cal/8 oz.
Pediasure Grow & Gain with Fiber <i>Abbott</i>	RTF - 8 oz. Vanilla.	A source of complete, balanced nutrition especially designed for children 2-13 years of age who need extra fiber. 240 cal/8 oz.
Pediasure 1.5 cal with Fiber <i>Abbott</i>	RTF - 8 oz. Vanilla.	A source of complete balanced nutrition with a higher caloric density to meet the higher energy requirements of pediatric patients who are at risk for malnutrition, require a higher caloric density, or have fluid restrictions. For children 1 to 13 years of age. For oral or tube feeding. 350 cal/8oz.
Boost Kids Essential 1.0 cal. <i>Nestle</i>	RTF - 8 oz. Vanilla Chocolate Strawberry	Nutritionally balanced formula for tube feeding or supplementation for children 1-13 with inadequate oral intake, increased energy needs, malnutrition. 240 cal/8 oz.
Boost Kids Essential 1.5 cal. <i>Nestle</i>	RTF - 8 oz. Vanilla Chocolate Strawberry	Nutritionally balanced formula for tube feeding or supplementation for children 1-13 with inadequate oral intake, increased energy needs, malnutrition, shortened feeding schedules. 360 cal/8 oz.
Boost Kids Essential 1.5 cal. with Fiber <i>Nestle</i>	RTF - 8 oz. Vanilla	A supplement for children 1-13 with increased calories needs, bowel management, inadequate oral intake, malnutrition, volume intolerance. 360 cal/8 oz.
Neocate Splash <i>Nutricia</i>	RTF - 8 oz. Unflavored Orange- Pineapple Grape Vanilla	Amino acid-based medical food for individuals over the age of 1. Nutritionally complete, ready-to-feed. Indications: Cow milk allergy, Multiple food allergies, Related GI and allergic conditions: Short bowel syndrome, EoE, FPIES, Malabsorption, GERD. For oral and/or tube feeding.
